Our New Plenary Secretary: Congrats to David Mollerstuen of Tendril

After a competitive vote that led to a runoff ballot with, the SGIP has a new Plenary Secretary. ***THANK YOU*** to all of our candidates for their willingness to be a part of the ballot and serve the SGIP -- James Bryce Clark (OASIS), Phil Davis (Schneider Electric), Jonathan Poor (Navigant Consulting) and Bill Swan (Honeywell). It was a competitive race due to the quality and competence of our candidates.

David Mollerstuen is a Senior Product Manager with Tendril in Boulder, Colorado. Tendril provides a comprehensive Residential Energy Management System platform, with specific applications for Consumer Energy Awareness, Demand Response and Load Control, Distributed Generation, Electric Vehicle Integration, and others.

David chairs the OpenADE Task Force within the UCA International Users Group (UCAIug) Open Smart Grid subcommittee, which is focused on defining requirements and services for systems that securely communicate actionable energy information on consumers' behalf (such as an individual consumer's electricity consumption and pricing data between that consumer's Utility and a consumer-designated 3rd Party).

David also co-chairs the Energy Services Provider Interface (ESPI) Task Force within the North American Energy Standards Board (NAESB). ESPI is standardizing the exchange of Energy Usage information between designated parties, and is building on the NAESB Energy Usage Information Model.

Previously, David has held development positions with Alcatraz Engineering, Tapwave, Palm, Claris, EO, and others. David holds a B.S. in Electrical Engineering and Computer Science from the University of California at Berkeley.

David will be on-hand this week in Nashville for a formal introduction. Learn more about the meeting here: http://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/Spring2011MtgDetails

The Smart Grid Testing & Certification Committee and ITCAs

The Smart Grid Testing & Certification Committee (SGTCC) is actively engaging with Interoperability Testing & Certification Authorities (ITCAs) as they implement the recommendations and best practices detailed in its Interoperability Process Reference Manual (IPRM) released in January 2011. The SGTCC views 2011 as a transition year during which it will provide guidance and assessment artifacts, as well as advisory support to ITCAs that are committed to migrate towards IPRM implementation for their testing and certification activities. A number of ITCAs have already indicated their intent to adopt these recommendations and have begun coordinating with the SGTCC in their efforts.

The SGTCC encourages existing ITCAs, as well as emerging ITCAs forming to address identified testing needs, to contact Rik Drummond, SGTCC Chairman to learn more about support available from the SGTCC.

Additionally, the SGTCC will be delivering an overview tutorial on the IPRM during the upcoming SGIP meetings in Nashville. This session will take place on Wednesday, March 30th at 2:15 pm, as part of the scheduled SGTCC meeting sessions (http://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/Spring2011MtgDetails). ITCAs and other interested stakeholders are welcome to participate to learn more about the IPRM.

The Spring 2011 Face-to-Face Meeting Commences Tomorrow!

We are a day away from the Spring 2011 Meeting in Nashville which will bring together business leaders,

industry experts, experienced practitioners, and international colleagues. From the Governing Board convening to discussion on the DOE Clearinghouse, this is a meeting not to miss!

Please note that this is a mandatory meeting that counts for Member voting rights. Members are encouraged to attend in person, but virtual attendance via web and phone counts for maintaining voting rights. The ***Remote Access details*** are now posted on the Twiki for registration.
