Smart Grid Interoperability Panel

February 5, 2010

Greetings Smart Grid Interoperability Panel Members!

The results of the recent ballot to instantiate initial membership in the Architecture Committee (SGAC) and Test & Certification Committee (SGTCC) have been tallied and a quorum of the voting membership reached. I am pleased to announce that these two standing committees have been confirmed by the SGIP. Now that the committees have been formed, the names of the chairs for each committee have been sent to the Governing Board for their review and confirmation. We plan to announce the chairs of the committees during our web meeting on February 8 at 1 p.m. EST.

The tabulation of the voting results are presented below.

	SGAC	SGTCC
Yes	198	202
No	27	23
Abstain	22	22
%Yes	80%	82%
Total	247	247

Thank you for your participation of this SGIP vote. I look forward to having these committees address the actions already given them by the Governing Board and providing their services to our SGIP community. In addition, we will work with these committees to establish the mechanisms in which other valuable SGIP members can contribute to their work, as well as develop the processes for committee membership expansion and maintenance.

Best Regards,
Steve Widergren, SGIP Plenary Chair
and the SGIP Administrator Team

NIST Issues 2nd Draft of Its Smart Grid Cyber Security Strategy and Requirements

The report now identifies more than 120 interfaces that will link diverse devices, systems, and organizations engaged in two-way flows of electricity and information and classifies these connections according to the risks posed by a potential security breach.

Priority Action Plan (PAP) Update: New Subscription Lists

To ensure participants are receiving PAP communications, the SGIP Administrator and NIST have established a new set of PAP email listservs which offer self-registration.

The SGIP Administrator is currently working to auto-register those presently on the current PAP listservs. However, we would greatly appreciate your cooperation in re-subscribing yourself to the desired PAP lists of your choice. This will ensure you are placed on the correct PAP list and confirm your participation.

You can find these lists with registration links on the TWiki ***here***.

EnerNex Corporation serves as SGIP administrator under a NIST-awarded contract enabled by the American Recovery and Reinvestment Act. For more information, go to http://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid.SGIP.
