

DRAFT

NIST Security Working Group (WG) Agenda

June 15, 2011

Time: 2:00pm ET

Duration: 1 hour.

USA Toll Free Number: 866-819-5964

Passcode: 5576521

The purpose of this meeting is to discuss and contribute to our new formulation of the goal (deliverable) of the security WG. The formulation is based on feedback received at earlier meetings.

Goal: Mitigate security impediments that may prevent adoption of cloud computing by Federal agencies.

Main Deliverable: A document, the "Security Impediments and Mitigations List". The document will contain a prioritized list of security impediments and, for each impediment, either a pointer to work that mitigates the impediment, or a description of approaches for mitigation.

Deliverables for other WGs: Security sections for the Reference Architecture document, the Business Use Cases, and the Standards WG roadmap document.

Deadlines for All Deliverables:

June 15, 2011 - first draft
subsequent versions approximately every 2 weeks as appropriate
Sep. 30, 2011 - final draft

Approach: NIST proposes an outline for the Security Impediments and Mitigations List. The WG nominates impediments and mitigations as necessary, critiques existing impediments and mitigations, and provides rationale for each. NIST maintains and guides the writing of the impediments list.
