Electronic Presentations

Due to many factors, speakers are not always able to supply us with their presentation before the conference. We have created an FTP directory for you to download the presentations specifically from this conference. This site will be available in one week after the event.

How to retrieve files from the FTP Server:

1. Open up your web browser
2. In the address bar type in: www.strategyinstitute.com/login
3. You will be asked for a Username: SmartG12
4. You will be asked for a Password: 112015
5. Once connected you will see a short list of files to select

**If you are unable to log on to the server, please turn off your firewall, or try accessing from your home computer. If you still have difficulties, please contact our Customer Care Team at 416-944-9200.

Please note that speakers reserve the right to not have their materials distributed. If you do not find a copy of the speaker’s presentation on the FTP directory, please contact the speaker.
