

CSWG/NIST Smart Grid Privacy Subgroup

July 6, 2012

- Rebecca Herold – Lead – The Privacy Professor
- Amanda Stallings – PUCO
- Tanya Brewer – NIST
- Brent Struthers – Neustar
- Ken Wacks – GWAC
- Paul Zumo – APPA
- Irene Gasko – FPL
- Krystina Schaefer - PUCO

Rebecca: Apologies to everyone for not receiving the agenda sent this morning. There is an issue with the mail service. You will likely get the agenda later today or tomorrow after the email service provider gets problems fixed.

Updates:

- NISTIR 7628 Vol2_V2 - Rebecca - Received additional ideas for what should be placed into the updated version. Going to send the outline for the updated version next week where it will receive a little more attention than it would have during this holiday week. If you have any ideas of what should be added, please let Rebecca know.
- 3rd Party Recommendations – Brent – Tanya and Brent worked on the last finishing touches this week to reorganize the document. Ready for presentation to the SGIP. Rebecca will post the document on the Twiki as draft materials. Rebecca will then send to Marianne. May place the update into the updated NISTIR for public comment sometime this winter.
 - Q: When will public comment be available?
A: It will definitely be available for public comment when it comes out with the updated NISTIR, at minimum.
- REQ 22 Gap Analysis – Tanya – document went to Frances who made some minor changes. Nothing substantial. It has gone to Marianne as a final document. Believe that it has been sent to SGIP Program Office. Training & Awareness – Rebecca – on hold until 3rd party docs are done. Now that those docs are finished, we will pick back up with slides sometime in the next two weeks (7/16).
- PEV Team – Tanya & Amanda – no progress thus far. Trying to get in touch with Mike Coop to keep progress going. Brent thinks Coop will be at SGIP meetings in Portland. Tanya will try to contact him while she is at the meetings.

- NISTIC – on hold
- Green Button – Tanya – drafted some security and privacy requirements. They went out to the people that are officially listed on PAP20 team. We received feedback which was positive. They have gone to the administrator for PAP 20. They will be discussed during SGIP F2F in Portland next week. Log-ins are available on the SGIP Twiki.
 - When the PAP20 requirements get updated on the website to include what we've drafted, it will be at <http://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/PAP20Objective1>.

Rebecca sent messages this morning to plan for guest speakers coming up. Rebecca will coordinate with Ken Wacks and Tim Schoechle directly to coordinate their session and another guest speaker outside of our group for another session.

Next meeting will be July 20, 2012 at 11:00 EDT
