**Attendance:**

Rebecca Herold . Privacy Professor  
Brent Struthers . Neustar  
Tanya Brewer . NIST  
Ken Wacks . GWAC  
Ruth Yoidaken . FTC  
Paul Zumo . APPA  
Eduardo Obregon - The University of Texas at El Paso  
Mary Ann Ralls . NRECA  
Ken Kassakhian . Colorado  
Christine Hertzog . SG Library  
Irene Gasko . Florida Power & Light  
John Hudson . Center Point Energy  
Dan Francis . AEP  
Tim Schoechle . University of Colorado, Boulder  
Ward Pyles . Southern Company  
Dan Friedman . Amdocs  
Chris Villareal . CPUC

**UK document review .** Chris Villareal

Amanda and Chris working on it. They are planning to speak soon, and should have something ready by the next call for Rebecca.

**Privacy Use Cases --** Christine Hertzog

Have been reviewing all of the comments received in a round-robin fashion. We are tracking comments, recommendations, and changes. We will provide a revised document to the group after we finish this process. It should be ready in time for the next round of NISTIR updates.

**Training & Awareness .** Rebecca Herold

Have been creating slides for various audiences, and are currently to the 3<sup>rd</sup> party topic. We are waiting for the 3<sup>rd</sup> party document to be finished before proceeding. We are on hold for a little while.

**PEV .** Tanya Brewer

The group has not met in a few weeks, but at the last meeting they looked over the Society of Automotive Engineers use cases for possible use in NISTIR 7628 update. There are a few more than currently in the NISTIR, but in looking at them it is hard to say which should be not included. The goal is to have the use cases paraphrased and formatted by the end of summer, and the privacy implications added in time for the winter NISTIR draft.

**NSTIC .** Tanya Brewer

The group is currently on hold until mid-August when the NSTIC pilot projects will be announced publicly. At the last meeting, Jeremy Grants (NIST, NSTIC Director) spoke with the group. He was not able to tell us any more about the possible pilot projects. He did speak with the group about the possible use of NSTIC in the utility space, and he thought this was very interesting.

early. Trying to finish up the gap analysis. Had a lot of discussion yesterday about the role of the utilities in verifying 3<sup>rd</sup> party companies in the authorization process.

**3<sup>rd</sup> Party document** . have gone through a lot of comments, but still have a lot to go through to finish. Brent will be scheduling the next meeting soon. We probably need 2 or 3 more meetings to go through all of the comments.

Mary Ann . Comments from Certicom (Todd Glassey) earlier this week in email. Have we received any further comments from him?

Brent . Have not gotten any more comments yet, but we will include them if we get them soon.

**NOTE:** If you still have comments on the 3<sup>rd</sup> party document ([https://collaborate.nist.gov/twiki-ssggrid/pub/SmartGrid/CSCTGPrivacy/Third\\_Party\\_Privacy\\_Best\\_Practices\\_Document\\_v2-0Clean5-10-2012.docx](https://collaborate.nist.gov/twiki-ssggrid/pub/SmartGrid/CSCTGPrivacy/Third_Party_Privacy_Best_Practices_Document_v2-0Clean5-10-2012.docx)),

please use the comment submission form

([https://collaborate.nist.gov/twiki-ssggrid/pub/SmartGrid/CSCTGPrivacy/Comments\\_to\\_3rd\\_Pty\\_Data\\_Practices\\_blank.xlsx](https://collaborate.nist.gov/twiki-ssggrid/pub/SmartGrid/CSCTGPrivacy/Comments_to_3rd_Pty_Data_Practices_blank.xlsx))

and send it to Brent. ([brent.struthers@neustar.biz](mailto:brent.struthers@neustar.biz))

**SGIP 2.0** . Rebecca Herold

When you get a chance, everyone should look at the proposed changes to the SGIP as they move to becoming a self-sustaining organization. There's a spot on the twiki where information is posted, and you may post comments there. You can see all of the feedback that has been submitted so far.

More information: <https://collaborate.nist.gov/twiki-ssggrid/bin/view/SmartGrid/BSPWG>

Two of the biggest changes from the current SGIP to SGIP 2.0 are

- ◆ NIST will be relinquishing a lot of their control of the SGIP. NIST will still be very much involved, but the SGIP will no longer operate because of a contract issued by NIST.
- ◆ The SGIP is moving to become a self-sustaining organization, so they will be charging membership fees in order to participate. There is a current proposal that would enact a tiered system for membership fees, based on organization size and desired participation level. For instance, if you wanted to be a voting member of the SGIP, it would cost more than just being a participant. It would also cost more if you wanted to have the possibility to have a seat on the Governing Board.

Currently, membership in the CSWG is free and open. We have many members in the CSWG and the Privacy subgroup that are not registered as SGIP members. Under the new changes, this will not be possible. Everyone wanting to participate in any part of the CSWG will need to be a paid member of the SGIP.

**News item from Rebecca:** Scotland has launched its Smart Grid Sector Strategy, led by an industry working group consisting of SSE, Scottish Power, GE Energy, Cisco, the University of
