

December 2, 2011 NIST Smart Grid Privacy Subgroup Meeting Notes

Minutes by Rebecca Herold

Please send this distribution list any necessary corrections or additions.

Next full group teleconference meeting:

Friday December 16, 2011 at 11:00am edt

Here are my summary notes from the meeting:

1. Past meeting notes

- See <http://collaborate.nist.gov/wiki-sggrid/bin/view/SmartGrid/CSCTGPrivacy>

2. Team Updates

a. Third Party Team: Brent Struthers (team lead)

- Tanya: Finished going through the third party data sharing documents comparison matrix. Comparing and determining the best practices for all 42 or so topics.

b. Privacy Use Cases Team: Christine Hertzog (team lead)

- Christine: Working on 3rd iteration of the use cases. Complete and have the final master document of recommendations as draft to rest of group by Christmas. Will provide a document control process with the draft to use for reviewing.
- Ruth: How many use cases?
- Christine: 46 total.
- Tanya: Call and I'll share my experiences with document management.
- Christine: Sure! Let me know phone number

c. PEV Team: Mike Coop (team lead)

- Provided update to Rebecca via email:
 - Two things to report—
 - The California PUC is working very aggressively on defining a protocol for sub-metering;
 - A few of us who are active in CSWG and the V2G DEWG (primarily Stan Klein, Hank McGlynn, and I) are active in the CPUC effort, specifically on the communications, security, and privacy piece.
 - Also, SAE has just launched J2931/5, which is defining the interface between telematics systems (e.g., OnStar) and the EV.
 - This one's a little messier than some of the other efforts; yesterday was the re-kickoff meeting of that group.
 - Stan and I will both be there to ensure that privacy issues are given proper care and feeding!

- We didn't hold our planned call this week, as I had a last minute conflict come up, but we'll be talking about EV privacy in the V2G DEWG meeting next week at Grid-Interop, as well as likely in the hallways.
 - Tanya: If anyone is interested in following along with the SAE working group, send email to Rich L. Telematics is more problem.
 - Stan: Could be an after markets issues.
 - Rebecca: Discussions taking place about PEV privacy more often in the news.
 - Ken: Issues will be more predominant in the coming year.
- d. NSTIC Team: Krystina Schaefer/Amanda Stallings (team leads)
- Amanda: still on hold.
- e. Training and Awareness Team: Rebecca Herold (team lead)
- Rebecca: Reviewed next set of Training and Awareness slides for PUCs
 - Went over drafts attached to meeting announcement and agenda.
 - Slide 5: Check on ITRON example
 - Several good feedback comments from those at the meeting

3. Miscellaneous

- a. Meetings are every other Friday**
- b. Next full group meeting will be Friday, December 16.
- c. If you know of any speakers who would be interesting and useful to provide a discussion for our group, let me know.
- d. Other issues or news related to smart grid privacy?

Thanks,

Rebecca
