

Transactive Interface Valuation Study

Goal of the paper is to capture a realistic “vision” for the home energy market in 5 to 10 years as it relates to dynamic pricing.

Input is required from a significant number of utilities and regulators (~Goal 25 of each?)

PNNL has agreed to be the writer of this paper with significant “review and comment” input from the identified utilities, regulators and H2G

Input to be in the form of review and comment with periodic webinar for Q & A (once a month)

Target audience is utility officers and regulators

Next steps:

- 1) Outline is posted on H2G site for comments (2weeks)
- 2) Recruit 25 utilities that will provide input described above
