e-Radio

Public Radio Satellite System®

Managing Power Consumption Via Satellite & FM Radio Technologies

Products demonstrated:

e-Radio Development Prototype CEA 2045 UCM (AC interface) for FM RDS WAN
e-Radio Pre-Production Prototype CEA 2045 UCM (DC interface) for FM RDS WAN

Company perspective on ANSI / CEA 2045:

The CEA 2045 strategy – providing a modular plug-in interface with base support for demand response and optional capability to provide more advanced smart grid features – enables greater flexibility for communication providers. It provides a quick-to-market roadmap for simple and easy-to-use (consumer-centric) devices with the ability to enable future smart-grid requirements as they become important to customers.

How It Works
