Smart Grid Interoperability Panel – Cyber Security Working Group
Meeting Minutes (September 2010)

NIST LEAD: Marianne Swanson

If you want to be on an email list, contact Marianne and Tanya.

NIST Contacts:
Marianne Swanson, marianne.swanson@nist.gov
Tanya Brewer, tbrewer@nist.gov
Victoria Yan, yan_victoria@bah.com

SGIP-CSWG Administration
Vice Chairs:
- Dave Dalva, ddalva@cisco.com
- Alan Greenberg, Alan.M.Greenberg@boeing.com
- William Hunteman, William.Hunteman@hq.doe.gov
Secretary: Mark Enstrom, mark.enstrom@neustar.biz

SGIP-CSWG SubGroups Information:
Listed below are the SGIP-CSWG leads for each group. More detailed information about each group is available at http://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/WorkingGroupInfo. If you would like to join any of these subgroups, please let Marianne and Tanya know and you will be added to the group(s).

Standing Subgroups

Architecture Group
CSWG Leads: Sandy Bacik

Bottom Up Group
CSWG Leads: Andrew Wright and Daniel Thanos

Crypto and Key Management Group
CSWG Lead: Daniel Thanos, Doug Biggs, and Tony Metke

High Level Requirements Group
CSWG Leads: Dave Dalva and Victoria Yan

Privacy Group
CSWG Leads: Rebecca Herold

R & D Group
CSWG Leads: Isaac Ghansah and Daniel Thanos

Standards Group
CSWG Leads: Virginia Lee

Vulnerabilities Group
CSWG Leads: Matt Carpenter and Matt Thomson

Testing and Certification Group
CSWG Leads: Nelson Hastings, Sandy Bacik and Robert Former

CSWG/SGSEC AMI Security Group
CSWG Leads: Darren Highfill and Ed Beroset
Remember:
Please mute your phone when not speaking, and please do not put the call on hold, as we will hear the hold music. Thank you.

CSWG Face to Face Meeting in St. Louis
Last week the CSWG had the face-to-face meeting in St. Louis. It was great to meet people. It was also good to talk about the next phases and the future goals of the CSWG. Please accept apologies for the issues with audio and the questions on the Go to Meeting.

New Sub-Groups
In the immediate future, two new subgroups will get underway. The CSWG/SGSEC AMI Security Group and the Testing and Certification Group will have their first meetings this week. The Twiki has been updated with the weekly meeting times.

PAP Liaisons
Many CSWG members agreed to be PAP liaisons during the St. Louis meeting. We now have Liaisons to PAPs 1, 2, 3, 5, 10, 11, 14, 15, 16, and 17.
Some PAPs have specific near term needs. PAP10 is requiring CSWG help on a use case. PAP 2 is asking for assistance to update their requirements table by Oct 30. It was agreed it will be a phased approach, and Alan and Tanya will help out.

Sub Group Work Plans
The sub group leads are to provide future work plans to Marianne by 25 September, for submission to the Smart Grid team at NIST.

NISTIR and Other Publications from the CSWG
There are no current plans to update the NISTIR. The CSWG will let the document get used, and assume that will generate comments. If there are any issues with the document, people will let us know.
There may be additional follow up work from the CSWG that could be published by the SGIP, and not necessarily by NIST.
Andrew and Daniel asked about creating a formal SGIP report series. They will send the proposal to Marianne. In the meantime, Marianne will obtain feedback from the NIST Smart Grid team and report back.

Roadmap
We need to update the 3 year roadmap pretty quickly as a lot of things have happened.

Standards sub-group
Four standards are being reviewed now by the standards team.
Frances had questions about the standards review process. The five questions being used right now came from Mike Peters at FERC. People should remember that the questions are high level; if there are questions please send questions to Annabelle Lee and Marianne.

If you are interested in doing a follow-up call on standards and questions, please send email to Vicky by COB on Monday.

**Privacy subgroup**

The group is identifying and expanding areas where there might be privacy impacts including consumer, institutional, and industrial consumers. Rebecca will talk with Marianne about publishing their new work if we do not update the NISTIR.

Brent Struthers and Rebecca are working on the agenda for the privacy day for the California PUC. The group will have updated slides by Wednesday. The material will include more detail from the NISTIR.

**R&D subgroup**

The R&D group will meet on Tuesday to cover the material presented at face–to-face meeting.

**NO CALL ON 27 September**

We will be on our way to California for the PUC briefing during the normal call time next week. There will be no call on 27 September.

Thank you!

**Next call for the SGIP-CSWG:** Monday, **October 4, 2010,** 11am EST.

**Call-in number:** 866-745-6097  **Participant passcode is:** 7413006

Please remember to mute your phones when not speaking.
