Scytl Election Night Reporting (ENR) presents election results in real time with just a few clicks of the mouse. The user-friendly and intuitive interface displays captivating maps and graphics to illustrate voter turnout, totals by vote type, and results by precinct. Scytl ENR even breaks down early voting and absentee numbers.

Scytl’s robust infrastructure ensures a continuous and scalable presentation of information without the risk of application downtime during critical periods of peak usage.

- Posting real-time results reduces calls by constituents, candidates and the media.
- In-depth results analysis and enhanced graphical presentation engage web visitors.
- Mobility provides optimal viewing on all devices – desktops, tablets and smartphones.
- Robust security protocol ensures the authenticity and integrity of election results.

“Scytl Election Night Reporting and the other Scytl products we’ve implemented have helped us to better engage and serve our constituents. Scytl ENR has proven to be the greatest tool that we’ve added. It allows our constituents to receive the election results on their mobile phones and tablets. I have received numerous phone calls and emails from constituents praising this new technology.”

Glenda Denton, Rockwall County, TX
Scytl ENR can take your office to the next level by enhancing your web presentation of election night returns and empowering web visitors to search for the information they want. The Scytl solution provides election highlights as well as granular details making Scytl ENR the election industry’s most comprehensive election night reporting tool available.

Empower visitors with easy access to the information they seek
Scytl ENR provides intuitive navigation so that web visitors can quickly find the information that’s important to them. Bar charts for each contest or issue on the ballot provide details down to the actual number of votes received, where they came from and whether they were election-day, absentee or provisional.

Reduce the number of calls requesting information
Color-coded maps show contest leaders in each precinct and district. Each precinct displays its level of reporting with designated colors to represent “not yet reported,” “partially reported” and “completely reported.” Maps deliver instant feedback on voting trends, minimizing requests for information from staff, candidates, political parties, interested parties and media outlets. They also chart voter turnout by precinct or county.

Provide automatic updates in near real time
Scytl ENR allows jurisdictions to easily update results as they are reported. Reports can be exported and integrated with existing systems and automatically distributed on election night. Administrators can preload a list of recipients who can then automatically receive the most recent updates in near real time. No special computer skills or expertise are required. Web portal visitors can also filter the results themselves, changing the view to see the results they seek.

Constituents and the media can view results in their preferred language
Scytl ENR provides multilingual reporting based on language requirements. Results can be presented in languages such as Spanish, French, Chinese and Russian.

Enhance outreach initiatives
Scytl ENR enhances public outreach and eliminates the reliance on IT staff to post the latest election results online. Posting up-to-the-minute results also dramatically reduces requests from media, political parties and candidates without additional effort on election night.
In-depth results analysis indicates voting trends
Post-election results data can be merged with electronic pollbook results providing a powerful tool for analyzing voting trends through detailed demographic information. Scytl ENR also enables election officials to easily archive election data and display it in a dynamic custom format.

Scytl ENR security protocol ensures the authenticity and integrity of election results
Scytl ENR can be integrated with voting tabulation software in such a way as to ensure the authenticity and integrity of the election results.

Social media increases viewership of election results
Scytl ENR embeds social media functionality to increase the viewership of your results presentation. This encourages the sharing of election results through sources like Facebook and Twitter which increases public participation and the exposure to your office.
Scytl eDemocracy Platform
Helping organizations around the globe improve participatory democracy, citizen empowerment and public transparency via innovative technology that covers the election and governance cycles from end-to-end.

Pre-Election
Scytl’s solutions assist election administrators with the planning, organizing and training activities that accelerate as each new Election Day approaches. From tracking campaign contributions, training poll workers, registering voters and delivering eBallots to overseas and military voters, Scytl provides efficiencies for elections and the officials that conduct them.

Election Day
During Election Day, the most critical period of the election cycle, election officials can rest assured that robust and user-friendly tools are being utilized both by election administrators and voters. Whether in-person or remotely, voters will experience a state-of-the-art web interface to answer questions and cast their vote.

Post-Election
After Election Day, work is far from over. This is where some of the most important steps take place to ensure accuracy and effectiveness of the voting system, aggregate and present election results for public consumption, and use the information learned from this election to make the next one even better.

eGovernance
Scytl provides the tools and technology to help manage civic and political actions during terms in office between election cycles. Government bodies and politicians can better communicate with and engage citizens by seeking opinions and promoting ongoing dialogue as well as monitor public opinion to incorporate them into electoral programs. In addition, legislative bodies can regulate agendas and facilitate in-chamber voting sessions.
