Staffing an election is one of the most challenging tasks faced by election offices. To successfully conduct elections, poll workers must be recruited, trained, assigned to polling locations, and retained. Scytl Poll Worker Management provides insight into each poll worker’s training, work history and party affiliation enabling election officials to make informed decisions relative to staffing logistics.

**Scytl Poll Worker Management** is a comprehensive and intuitive solution that manages the various types of interactions with poll workers. It improves election productivity by effectively managing every step of the poll worker hiring and management process. It also integrates with Scytl Election Training to further enhance the quality and efficiency of your election workers.

- Improve office efficiency while reducing paper loads.
- Save time by auto-generating assignment letters through the system.
- Quickly and easily schedule poll worker training online.
- Configure the system to meet your changing needs.
- Predictive staffing and scheduling for more efficient polling station assignments.

"On a scale of 0-10, the Poll Worker Management team is an 11 and we love everything we are seeing so far."

Scytl Poll Worker Management enables staffing consistency and accessibility

Scytl Poll Worker Management enables your office to proactively engage with poll workers and election staff. This user-friendly and versatile solution streamlines the hiring, training, management, and deployment of election poll workers and essential election staff. This intuitive web-based solution is available in multiple languages and is accessible anytime, anywhere.

Enrollment, replacement, and worker history

Scytl Poll Worker Management allows election offices to track poll worker and election staff history, including previous training, assignments, and language proficiency in order to make informed choices about poll worker placement.

Predictive staffing and scheduling

Predictive staffing enables election managers to better determine how to staff their polling sites. Staffing history and voter turnout data along with the current registered voter list are used to optimize staffing levels at each polling location.

In conjunction with predictive staffing, predictive scheduling benefits election managers by suggesting schedule adjustments to accommodate potential fluctuations in voter turnout.
Data integrity and security

Scytl Poll Worker Management offers advanced encryption and access controls. This ensures that all data is secure and private. Unauthorized modifications or attempts to tamper with the election configuration are detected and thwarted.

Budget and payroll management

Scytl Poll Worker Management can export to various payroll systems quickly and easily. Its pre-programmed pay rates and electronic attendance records significantly streamline the accounting and payroll process.

Configurable access based on user roles

The Scytl Poll Worker Management user interface is simple by design. It can be integrated with different data sources and legacy systems including payroll systems and poll worker databases such as Microsoft© Access and Excel. It also provides password protection and configurable permission levels.

Tracking, Training and Certification

Scytl Poll Worker Management integrates easily with Scytl Election Training, enabling poll workers to receive electronic and video instruction to perform their duties on Election Day. Workers can be classified by their specific role to ensure that they are trained correctly to fulfill their responsibilities.

A powerful search engine enables election offices to easily identify individuals that meet different qualification criteria and have already been assigned to a specific location. In addition it provides the ability to modify status in the event poll workers need to be replaced or moved to a different location.

**Scytl eDemocracy Platform**

Helping organizations around the globe improve participatory democracy, citizen empowerment and public transparency via innovative technology that covers the election and governance cycles from end-to-end.

**Pre-Election**

Scytl’s solutions assist election administrators with the planning, organizing and training activities that accelerate as each new Election Day approaches. From tracking campaign contributions, training poll workers, registering voters and delivering eBallots to overseas and military voters, Scytl provides efficiencies for elections and the officials that conduct them.

**Election Day**

During Election Day, the most critical period of the election cycle, election officials can rest assured that robust and user-friendly tools are being utilized both by election administrators and voters. Whether in-person or remotely, voters will experience a state-of-the-art web interface to answer questions and cast their vote.

**Post-Election**

After Election Day, work is far from over. This is where some of the most important steps take place to ensure accuracy and effectiveness of the voting system, aggregate and present election results for public consumption, and use the information learned from this election to make the next one even better.

**eGovernance**

Scytl provides the tools and technology to help manage civic and political actions during terms in office between election cycles. Government bodies and politicians can better communicate with and engage citizens by seeking opinions and promoting ongoing dialogue as well as monitor public opinion to incorporate them into electoral programs. In addition, legislative bodies can regulate agendas and facilitate in-chamber voting sessions.
